# ARAS - Disease Registry System

SRISHTI Software  
progress through creation...

**Disease registry solution:** Registries represent a unique and powerful model for the collection of observational or epidemiologic data, and are becoming a widely adopted business tool in the pharmaceutical, medical device, biotechnology, academic and private healthcare settings. Providers and Academic Medical Centers are using this post-approval research to accelerate innovation, produce faster knowledge gains and alert companies to potential problems quicker than any other available tool.

For physicians by physicians. Disease registry demonstrably improves care with minimal disruption to office workflow for a modest price. Disease Registry is a patient-centric, all conditions registry bringing evidence-based medicine to the point of care without stifling each physician's individualized excellence.

Srishti has a DR solution.

### New Care Recipient Registration

This is the first step where in a patient is registered with the help of a form. Once the form is completely filled the patient data is saved. This also gives option to send SMS and print the bar code.

Is Vulnerable?\*  Y  N

Requires Restraint\*  Y  N

Alert Message\*

## Record association

There is option of record association. When this link is clicked, if the mother and father detail entered in the patient personal detail page has this patient record and if the allocated id matches with the database then the record gets associated as father and mother.

PARAS ENABLING HEALTHCARE ...

Name : Abdul  
Care Recipient Id : 17  
Age : 15 Y  
Gender : Male

PLEASE ENTER CARE RECIPIENT ID 17 IF CARE RECIPIENT ID IS NOT KNOWN, PLEASE USE SEARCH

**New Record Association**

Sr No	Patient Id	Association Type	Description	Options
1	7	Father		Show Edit
2	4	Mother		Show Edit

## Sample Collection

We have an option in this wherein we can request for sample collection to the lab. The below images shows the same. Once the sample is collected a bar code is generated.

PARAS ENABLING HEALTHCARE ...

Name : Padma  
Care Recipient Id : 4  
Age : 30 Y  
Gender : Female

**LAB TESTS**

Food Taken Time : 2008 November 4 13 17

Diabetic Treatment Taken Today No

Test Code	Check Tests to be done	Specimen
	<input checked="" type="checkbox"/> Biological Sample Collection	Blood

Collect Specimen Print

## Clinical:

Similarly we have an option called clinical where in the problem is registered with ICD code, which is then followed by assessment. The patient forms then can be downloaded.
